

Get Involved

1. How to Get Involved

1.1. Use AntDepo Software and Give Us Feedback

Use AntDepo, report bugs and make feature requests. AntDepo's applicability is fairly broad. We need your help to evolve AntDepo. Discuss your opinions on the [antdepo-user](#) mailing list.

1.2. Develop and Share Modules

Command modules are how you adapt your current management procedures into the AntDepo framework. A module you develop might be useful to others. Until we have a public module library, [let us know](#) and we will create a reference to your module.

1.3. Contribute Code or Documentation Patches

Participate in the development of AntDepo. Submit a patch for a bug fix or feature. Post it to the [antdepo-dev](#) mailing list.
